## INTRODUCTION

This technical manual lists the technical manuals and supporting publications essential to the operation and maintenance of Communication Control Group AN/GRA-98. The purpose of this list of applicable publications (LOAP) is to enable personnel to select and requisition publications pertinent to the countermeasures receiving set and to eliminate the need for compilation of similar data by individual activities.

This manual contains a List of Publications and an Index of Facilities. The List of Publications is a listing of technical manuals and supporting commercial publications. Equipments within the facility are listed in alphanumerical order. The publication number for each manual appears adjacent to the entry for the site, facility, or equipment. The publication type is directly adjacent to its publication number. Missing publication dates will be supplied when available. At the end of the equipment listing for the facilities is a heading entitled "Supporting Publications". Under this heading, nonstandard aerospace ground equipment (AGE), standard AGE, and supporting technical manuals applicable to the facility and its associated equipments are listed in alphanumerical order. The Index of Facilities is a listing of the facility code numbers

and the numbers of the pages on which information related to the facilities appears.

The following publications were used in preparation of this technical manual:

MIL-HDBK-300, Technical Information File of Aerospace Ground Equipment, Air Force

MIL-STD-196, Type Designation System, Joint Electronics

MIL-T-9941, Technical Manual: Ground C-E Equipment, General Requirements for Preparation of

T. O. 0-1-31, Numerical Index of Technical Publications, Ground Electrical and Electronic Equipment Publications

T. O. 0-1-33, Technical Publications Test Equipment Publications, Numerical Index of

T. O. 0-1-35, Air and Missile Base Operating Equipment Publications, Ground Handling Support

T. O. 33K-1-01, Calibration Procedures, List of Applicable Publications
