

CHANGES IN
BULLETINS

- 148, Issue 2 - Perforator Transmitter (Model 15), Page 10
160, Issue 1 - Type Bar Page Printer (Model 20), Page 36
166, Issue 2 - Perforator Transmitter (Model 15), Page 11

On units equipped with an 8-1/2" spacer bar, the first paragraph of the "UNIVERSAL BAR BRACKET ADJUSTMENTS" should be modified to specify ".060" to .090" between the universal bar and the spacer key lever." The .060" to .080" requirement still applies to other key levers.
