

REPORT AND STATEMENT
OF THE ATTORNEY GENERAL

1960	1961	1962	1963	1964	1965
100,000,000	100,000,000	100,000,000	100,000,000	100,000,000	100,000,000

Statement that 1965 was a record year for energy production in the United States, with record growth in power plants, and that energy resources available for export brought to the attention of the public the need for increased energy production. That up to the present time there have been no significant changes in energy production.
