

CHANGES AND ADDITIONS TO BULLETINS

- 1031B, Issue 3, (Model 14) Type Bar Tape Printer
- 1063B, Issue 2, (Model 20) Type Bar Page Printer
- 1074B, Issue 2, (Model 26) Type Wheel Page Printer
- 1119B, Issue 1, 2 Channel Start-Stop Transmitter Distributor

This correction sheet covers parts ordering information for Bell System Code Designation Plates for apparatus identified in the bulletins listed above.

The plates, as furnished, are not stamped with the Bell System Code; the applicable code should be stamped in the blank space provided when units are converted in the shop. In case of field conversion the marking should be applied by scratching the code number with the corner of a contact file or screwdriver to be followed by permanent stamping or replacement of plates when the unit is sent to the shop.

The following plates are now available:

INSCRIPTION	PART NUMBER
<input type="checkbox"/> TRANS. DISTRIBUTOR	120450
<input type="checkbox"/> TYPING UNIT	120452
<input type="checkbox"/> KEYBOARD	120453
<input type="checkbox"/> MOTOR UNIT	120460

Two 93597 screws are used to secure any of the above code plates.
