

BELL SYSTEM PRACTICES
Teletypewriter and Data Stations

SECTION P34.550
Issue 2, December, 1961
AT&TCo Standard

28 APPARATUS CABINET

LUBRICATION

Contents	Par. No.
1. GENERAL	1.01-1.03
2. LUBRICATION DETAILS	2.01-2.04
3. ASSOCIATED BELL SYSTEM PRACTICE....	3.01

1. GENERAL

1.01 This section contains the specific lubrication procedures for the 28 apparatus cabinet. The material herein, together with the section entitled Teletypewriter Apparatus, Lubrication, General Information and Routines, provides the complete lubrication information for maintenance.

1.02 This section is reissued to add the lubrication procedures for the 28 apparatus cabinet housing reperforator-transmitter sets and multiple-mounted typing reperforator units. Since this is a general revision, the arrows ordinarily used to indicate changes have been omitted.

1.03 The lubricants to be used and their method of application are covered in the general section. The lubrication symbols 03 and 04 are used herein to specify that three or four drops of oil respectively are to be applied at the points indicated.

Note: In this section, reference to the use of Lubriplate on the cabinet slides pertains to the initial lubrication at the factory; thereafter, these surfaces should be relubricated with the grease recommended in the general lubrication section.

2. LUBRICATION DETAILS

A. Apparatus Cabinet Housing Multiple-mounted Typing Reperforator Units

2.01 Rear View

2.02 Front View

B. Apparatus Cabinet Housing Reperforator-Transmitter Sets
