Re: HAL P/N 801-60061 (ST-8000A A1T1)
HAL P/N 801-60062 (new, alternate ST-8000A A1T1)
HAL P/N 801-10311 (ST-8000A A1T2)

As a result of input from our Host Nation Approval consultant (AMADOR / Mobile Radio), the specifications and supplier for these two audio transformers must change. We are informed that the TRIAD TY-304P and TY-141P parts originally specified will not meet British approval. Therefore, please modify as follows:

A: HAL P/N: 801-60061; SCD801-60061:

1. DELETE TRIAD as an approved vendor and TRIAD TY-304P as an approved part.
2. CANCEL all purchases of the TRIAD TY-301P.
3. Add MIDCOM, INC, Wattertown, SD as the approved supplier and Part Number "671-8249" as the preferred part.

B. HAL P/N: 801-60062; SCD801-60062:

Add HAL P/N 801-60062, MIDCOM, P/N 671-8236 as an alternate ST-8000A part. This is the same transformer, but without a center-tap (CT). It may be used in the USAF version of the ST-8000A, but will not allow use of the "Phantom Keyline" feature (not required by contract, but an existing "1280 feature").

C. HAL P/N: 801-10311; SCD801-10311:

1. DELETE TRIAD as an approved vendor and TRIAD TY-141P as an approved part.
2. CANCEL all purchases of the TRIAD TY-141P.
3. Add MIDCOM, INC, Wattertown, SD as the approved supplier. MIDCOM will supply a Part Number next week (1/7/91). Call "Colleen" for data if no response by 1/9/91.
