HAL COMMUNICATIONS CORP 07 February 1991

ST-8000A FSK MODEM PARTS LIST BINDER NO. 6 DEPARTMENT: INVENTORY

This Parts List Binder is one of SIX, each issued to the following departments: CONFIGURATION MANAGEMENT, ENGINEERING, QUALITY ASSURANCE, PRODUCTION, PURCHASING, INVENTORY.

This Binder contains certified copies of all parts lists applicable to the ST-8000A. The enclosed lists replace and out-date <u>all previous lists</u>. Previous lists should be <u>destroyed</u> or at the minimum marked <u>obsolete</u>.

NEW VERSIONS: As the need arises, the <u>Configuration Manager</u> will issue revised parts lists. <u>Only</u> the Configuration Manager or his delegate may issue a revised parts list. All approved parts lists will be so-marked by the APPROVED date stamp. Do NOT use any parts list that is missing the APPROVED date stamp. Each binder holder shall be responsible to see that only current revision copies are placed in his binder; OLD VERSIONS SHALL BE DESTROYED. Each Parts List Binder is subject to spot inspection by HAL Management <u>and</u> certain customer representatives.

ERRORS: Parts lists change - and errors occur. Please issue a $\underline{\text{written}}$ note detailing all changes and errors found. Do $\underline{\text{not}}$ simply change your own parts list copy! The Configuration Manager will issue new approved parts lists that incorporate changes and corrections.

COPIES: The general policy shall be that copies of parts lists are not made. However, in the special case of Purchasing and Inventory, working copies must be made both to order parts and to pull parts for production runs. In these two cases, the Purchasing Agent and/or Inventory Control Manager may make limited photo-copies of parts lists as they are required. However, these copies shall be logged onto the attached COPY RECORD and each copy shall be approved by the Configuration Manager prior to use.

PART NUMBERS & SPECIFICATIONS: Each HAL part number referenced in the Parts Lists is supported by a Source Control Drawing, Specification Control Drawing, or Altered Item Drawing ("SCD Binders"). These drawings detail the specifications, manufacturer, and manufacturer's part number which are approved for a given HAL Part Number. ONLY these specified items are approved for purchase and use by HAL Communications Corp. If it is desirable that additional specifications, manufacturers, or manufacturer's part numbers be approved, the SCD must first be revised. SCD's are prepared by Engineering and administered by the Configuration Manager.

George W. Henry, Jr. Configuration Manager
